1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Borroni et al. (U. S. Pat. No. 6,227,012)..

Re claims 1 and 12, note the Borroni is cited disclosing a washing machine comprising: a tub having an open front side to hold water and detergent; a drum rotatably installed in the tub to hold laundry; a motor rotating the drum; a cabinet having the tub and the motor inside; and a detergent storing assembly(see fig. 1) at the cabinet to provide the detergent to detergent to the tub, the detergent storing assembly comprising: a detergent box having an open topside to store the detergent and to provide the detergent to the tub for washing; a lid part (40 for example) fixed to the topside of the detergent box to open/close; and an incorrect-assembling preventing means (inherently, front guard 58, 62) for leading the lid part to a correct position for a reciprocal assembling of the lid part and the detergent box.

3. Claims 2-11 and 13-20 stand objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In Cho, Blauert et al., Ahn, Hildebrand, and Babuin note the detergent dispensers.
